MUNICIPAL FINANCE • FINANCIAL SYSTEMS • AUTOMATION & DATA

PROFESSIONAL SUMMARY

Financial and systems professional with 12+ years of progressive City of Tulsa experience across financial forecasting, capital planning, treasury, debt administration, and revenue operations. Combines public-finance expertise with hands-on automation and application development using Excel/VBA and Python. Experienced in managing $1B+ in municipal debt, tracking 300+ capital projects, improving financial workflows, and serving as a Tyler Munis Project Ledger functional lead.

CORE SKILLS

Financial Planning & Analysis • Municipal Budgeting & Capital Planning • Debt & Treasury Management • Revenue Reconciliation • Financial Modeling & Forecasting • Workflow Automation • Python Application Development • Excel/VBA • Data Transformation & Reporting • ERP Functional Leadership • Requirements & User Support • Compliance & Internal Controls

PROFESSIONAL EXPERIENCE

CITY OF TULSA

Financial Forecast Analyst | *March 2023–Present*

- Manage budgeting, appropriations, and financial tracking for 300+ long-term capital projects valued at $500M+, spanning streets, bridges, public safety, public facilities, economic development and parks.
- Develop revenue estimates, multiyear projections, and financial models to support annual budget development, capital planning, and spending analysis.
- Coordinate budget amendments and fund reallocations; reported improvements in capital deployment of 25%.
- Prepare monthly and ad hoc financial reports and present capital funding and bond-impact information to the Sales Tax Overview Committee, the Mayor, and City leadership.
- Conduct feasibility analyses for public/private economic development proposals and coordinate project appropriation transfers during departmental reorganizations.
- Facilitates monthly Capital Improvements Plan (CIP) status update meetings with departments to ensure timely expending of funds for long-range capital projects.
- Serve as interim supervisor during supervisor absences and provided internal controls and oversight for expending capital project funds.

Treasury Analyst II | *July 2016–March 2023*

- Supported structuring and administration of $1B+ in municipal debt across 25+ bond issues and state loans, coordinating compliance and bond-sale documentation.
- Built financial models for debt coverage, tax-levy projections, utility rates, and investment decisions; contributed to refinancing opportunities that saved $2M+ in interest costs.
- Managed liquidity and fund transfers; monitored arbitrage compliance; and prepared financial reports for City leadership, City Council, department heads, various City Authorities.
- Served as interim supervisor during supervisor absences and provided internal-control oversight across treasury, cash, and revenue-processing activities.

Treasury Analyst I | *May 2015–July 2016*

- Oversaw revenue processing of $5M+ monthly with 99.5% accuracy across utility, Municipal Court, and general revenue operations.
- Implemented automated revenue tracking that reduced manual processing time by 40%; reconciled payment systems and resolved 100+ discrepancies monthly.
- Trained and mentored 5+ staff members, monitored arbitrage compliance, and maintained a 95%+ first-contact resolution rate for treasury inquiries.
- Served as supervisor to Revenue Processing staff and liaison between entry-level staff and senior management.

Revenue Inspector & Processor | *July 2014–May 2015*

- Reconciled accounts, investigated payment and licensing issues, supported ordinance compliance, and maintained accurate financial records.
- Handled the issuance of Business Licenses for food establishments, mobile vendors, massage establishments, sexually oriented businesses, taxicab companies and operators, pet licenses, and first response alarm licenses.

Revenue Processor | *July 2012–July 2014*

- Processed 500+ daily transactions and supported $10M+ in annual collections across licenses, utility payments, court fees, permits, and taxes.
- Researched outstanding court cases and balances for citizens making payments towards court fines and fees.
- Assisted in training and on-boarding new Revenue Processors that were hired on.

SELECTED TECHNOLOGY & PROCESS PROJECTS

Municipal Budget Ordinance Generator | *Python / Flet*

- Built a Python desktop-style user interface with Flet to collect structured budget-amendment inputs through dropdowns and load reference options from Excel or JSON files.
- Designed the workflow to standardize municipal ordinance preparation and reduce repetitive manual data entry; final output format and measured time savings should be confirmed before submission.

Excel/VBA Financial Workflow Automation | *Excel / VBA*

- Developed VBA-enabled workbooks to gather and validate user inputs, then transform information into structured output tables and reporting sheets.
- Automated recurring monthly reporting workflows using formulas including XLOOKUP, SUMIFS, and text concatenation to convert raw inputs into usable financial reports.

Tyler Munis Project Ledger Functional Area Lead | *ERP / User Support*

- Serve as functional lead for the Project Ledger area, providing training and technical support to 20+ staff and supporting adoption of system workflows.
- Contributed to the implementation of credit-card payment processing and banking software, improving transaction efficiency by 30%.

Capital Planning & Debt Programs | *City of Tulsa*

- Supported financial structuring for the $510M Vision Capital Improvements Program and development of three consecutive annual budgets.
- Designed models for utility-rate studies, debt-service projections, and economic-impact analysis; presented capital funding updates to oversight committees.
